

# HONEYBERRY

*Lonicera caerulea edulis*

## Cinderella

The bushes are a bit smaller than the other varieties (3-4') but the fruit a bit larger.

Drought, pest and disease resistant. Fruit is medium to soft firmness, good yield, medium size berries with excellent flavor. Preferred fruit for fresh eating. Needs a pollinator.

## Tundra

Tundra fruit is firm yet tender to melt in your mouth. A nice sweet and tangy flavor, a long flat oval shape with above high yields, large fruit with excellent flavor, shape, and size. 5-6' in height. Needs pollinator.
